DPD-5263
3 August 1959

MEMORANDUM FOR: Security Officer, DPD

SUBJECT: [redacted] Requirement

1. On 3 August 1959 [redacted] stated that Dr. George Valli, Chief Scientist of the Air Force, informed him that the AF is setting up a committee to make a study and evaluate the radar reactivity problem relative to the B-70. Valli asked [redacted] to help out. (Comment: Will clarify if [redacted] assistance will be informal or as a member of the committee.) Valli stated that a British individual named Trevor MOSS, who was in Washington on 31 July, would be involved in the study. When [redacted] indicated that he would like to have a chat with MOSS, Valli said that Lt. Col. Kent HOWARD, Office of the Scientific Advisory Board, Pentagon, would know if MOSS still was in town.

2. [redacted] asked the undersigned to do the following:

- a. Discreetly determine if MOSS is available in Washington.
- b. Ascertain from Project Security on what terms would he, [redacted] be permitted to talk to MOSS about the radar reactivity topic.

JOHN PARANGOSKY
Deputy Chief
Development Branch, DPD
